

Junction & terminal boxes ESI, ESP, ESA, ESX, GWR, TNCN

for Zone 1 and Zone 21

BARTEC junction and terminal boxes are designed and approved for Zone 1 and 2 as well as Zone 21 and 22.

They are particularly suitable for applications under extreme environmental conditions and they provide reliable protection under heavy loads. The housings are made of different materials to suit all needs. We offer preassembled junction & terminal boxes and custom-made solutions.

- Tailored solutions, use of right size / material of enclosure
- Long service life
- Certified to many standards

Description

When working in hazardous areas, the safety of personnel and equipment depends on compliance with the relevant safety regulations. The people in charge of installation and maintenance bear a special responsibility. It is essential that they have an exact knowledge of the applicable rules and regulations. The instructions provide a summary of the most important safety measures and must be read by everyone working with the product so that they will be familiar with the correct handling of the product. The instructions have to be kept for future reference and must be available throughout the expected life of the product.

Electrical data

Ambient temperature	Dependent on installed components. Please pay attention to the information on the marking plate. -60 °C to max. +80 °C (-76 °F to max. +176 °F)
Temperature Classes	T6, T5, T4, T3 T80 °C, T95 °C, T130 °C
Voltage	max. 1000 V *
Nominal current	max. 690 A *
Maximal cross-section	max. 400 mm² *

* The rated values are maximum values. The respective built-in components cause the actual electrical values. The manufacturer specified the final rated values, within the limits of the maximum values, and depending on the supply conditions, mode of operation, equipment protection level and so on.
The circuits must be interconnected in accordance with the requirements of the current standard IEC 60079-14. For intrinsically safe circuits, the requirements of IEC 60079-25 also apply.
